6th International Symposium

**Global Mental Health -
Mental Health in Developing
Countries**

8th November 2014, Munich

**Center for International Health
CIH^{LMU}
Global Mental Health^{LMU}
i.nez e.V.
International Network for Cooperation
in Mental Health**

Dear Colleagues,

The Center for International Health (CIH)^{LMU}, the Global Mental Health Group^{LMU} from the Department of Psychiatry and Psychotherapy, and the International Network for Cooperation in Mental Health (i.nez), are organizing the 6th International Symposium on "Global Mental Health – Mental Health in Developing Countries". We will present an overview of the importance of mental health for developing countries. The symposium is open to all staff and students interested in this topic.

More than half a billion people worldwide have a neuropsychiatric disorder or are dependent on alcohol or drugs. More than 80% of these people live in a developing country and most of them do not receive appropriate treatment. Many are stigmatized and experience prejudice, social exclusion and frequent violations of their human rights. All of these factors can cause serious psychological, physical, social and economic harm.

This symposium intends to give an overview of the importance of mental health for developing countries with reports from Africa, Asia and Latin-America.

You are cordially invited to participate in the 6th International Symposium "Global Mental Health – Mental Health in Developing Countries".

Prof. Matthias Siebeck, CIH^{LMU}

Dr. Andrea Jobst and Dr. Sandra Dehning,
Global Mental Health Group^{LMU}

Dr. Wolfgang Krahl, i.nez
