

# FUTURE OF FOOD

## Symposium

### GLOBAL PERSPECTIVES ON SUSTAINABLE AND RESILIENT FOOD SYSTEMS TRANSFORMATION

#### Keynote Talks

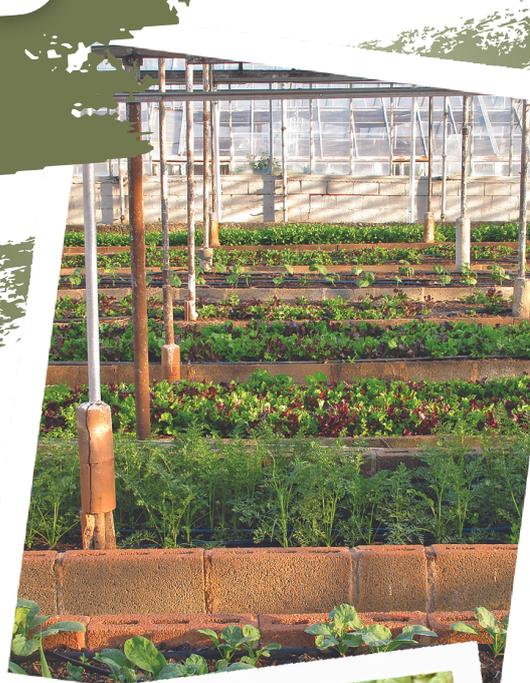

Our current food and land use systems play a critical role in various global challenges, from climate change and biodiversity loss to malnutrition and economic inequality. Yet, these systems also offer some of the most promising opportunities for sustainable solutions. Learn more about the current situation and suggestions for the future of our food from our international and multidisciplinary keynote speakers.

#### Best Practise Examples

Be inspired by practical examples of people from the Global South and North who have made it their life's work to fight for a more sustainable and resilient future of our food.

#### Panel discussions

By reimagining and reshaping our current food systems, we can move towards a more sustainable, healthy, and equitable future for all. Join our international panelists as they discuss how we can inspire action at the grassroots level, influence policy, and remind us of the intimate connection between our food, our health, and the planet.
